

NAME

ffcp – installation and setup instructions

SYNOPSIS

Plug in USB stick or copy files to E: drive, then run FSS_Run.

DESCRIPTION

This manual explains how to install and run FFCP.

INSTALLATION

First, install NodeJS.

If you have a USB stick with the files:

Plug in the USB stick into your computer.

Make sure that the USB stick is device E: (if it isn't, see the section "If you already have the E: drive").

Go into the USB drive and click on "FSS_Run".

Follow the program instructions, and you will be in FFCP.

IF YOU ALREADY HAVE THE E: DRIVE

Download and extract the zip file from the download page.

Copy the files to the E: drive (your drive must be at least 100 GB).

Go into the E: drive and click on "FSS_Run".

Follow the program instructions, and you will be in FFCP.
